

Energy Services

The growing demand for energy is challenging retailers and complex organizations to use energy in a way that is as efficient and environmentally sustainable as possible.

From Start to Finish

With today's technology, the potential savings are immense. LVI Energy is on a very short list of companies in the U.S. to support customers with turnkey solutions and multiple product offerings – in a way that is cost effective and environmentally sensitive.

Turnkey Solutions

LVI Energy offers turnkey solutions with a variety of energy products and services that fit your company regardless of brand – what we call “brand neutral”. We find the solutions that best fit your company and not products or services that other providers are limited to.

We take the headache out of rebate tracking. LVI Energy tracks renewable energy incentives and policies established by the federal government, state and local governments, and most local utilities. Financial Incentives include a variety of tax incentives, rebates, green building incentives, leasing/lease purchase programs and production incentives. LVI Energy handles this process from pre-site inspections to our client receiving the actual incentive/rebate.

The Lane Valente Advantage

Information Management – Call Center Available 24/7/365

Sr. Asset Manager, Retail
Chase Banks

Custom Pricing Models

Lane Valente offers the most comprehensive and competitive snow & ice removal services in the U.S. We offer three different pricing plans to fit any budget. Let us help tailor a snow & ice management program to fit your specific needs.

Per Push

Rate will vary per site and will be based on each visit we make during a storm event.

Event Pricing

Fixed rate per each event. Based on the total accumulation for a storm event.

Seasonal Pricing

A fixed annual fee – regardless of total number of snow events or snow accumulation.
