- Industry Leader & Extensive Experience in Retail
- Reduction of Change Orders
- FastTrac™ custom project reporting captures plans, permits and photographs in real-time.

The Lane Valente Advantage

Project Site Surveys

Nationwide roll-outs and open remodels require careful consideration between design, management and construction teams. With Lane Valente on your team, we're confident your project will be performed on-budget, on-time, and to your satisfaction. Our success depends on it. Each project managed by Lane Valente is self-performed by our cross-trained specialists in general construction, fixture installation, data wiring, point of sales wiring, electrical and lighting installations. And because our installers are cross-trained, it is not necessary to have multiple trades for a project roll-out. Ultimately, our processes make possible the most effective and efficient use of time.

"I have worked with Lane Valente on multiple projects throughout the United States, and they have continued to deliver high quality work with excellent customer service. They are strong on open remodels and I highly recommend them for future work"

Director of Construction

FedEx Office
