

# Meet our EV team

**Tom Bennett, President  
Energy Services**

Tom first introduced level-1 charging to LVI back in 2009, and he is our most senior EVSE subject matter expert. In 2009 and 2010, Tom was integral to LVI being awarded EV charger roll-outs for the Cities of Austin, Dallas, and Houston with hardware from Coulomb Technologies (now ChargePoint). Tom has experience sitting on numerous EV advisory councils across the country and is a third generation EV driver.

**David O'Sullivan  
Vice President, Engineering, Estimating and Energy**

David has 28 years of experience with construction and energy initiatives that have spanned project design, estimating, and procurement. David oversees our design partners and estimating team, including New York Power Authority's EVSE projects in Lagrangeville and Itaca, NY, and JFK Airport. David has earned a bachelor's and master's degree in engineering from Manhattan College.

**Brian Hall  
Vice President, Construction**

Brian has over 20 years experience working in construction. While he started as a carpenter, he quickly became an expert in every aspect of construction. Brian's resume includes projects in various sectors, including commercial office and retail multifamily, and government. Brian's approach to managing technicians and attention to detail are key to our success.
